Message From the President

In the last ten years, so much has changed in our professional world that it is not difficult to fathom something phenomenal is happening almost on daily basis. This phase of rapid evolution provides us with endless opportunities to learn, experience and share.

In just about 30 years, surgical oncology has moved on from a relatively ‘new’ speciality to the place to be!! The next level of specialisation, which is organ or system based, has arrived. Information, tools and techniques are flowing in at such a fast pace today that even to master a small area of defined work, one needs to be really dedicated and work as a team. In such an environment, I am sometimes confronted with basic questions like, What is surgical Oncology & Who is a surgical oncologist?

The simple answer would be ‘Surgical oncology is the treatment of malignant tumours by surgical techniques’. By this definition, every surgeon is a surgical oncologist, and this is where the complexity begins.

In its purest form, I would say any surgeon, who is trained and committed to handle modern cancer surgery, as part of a team consisting of pathologist, radiologist, medical oncology, radiation oncologist, molecular oncologist, preventive and palliative care providers etc., and is dedicated to this 100% of her/his professional time, would qualify. This person could be treating tumours from head to toe or may be focussed on a particular system / organ etc. depending on the place and institution he is working for. Whether this person is an MCh in surgical oncology, Gyne onco, Head and Neck onco, GI, Thoracic, Endocrine, Urology, Plastic & reconstructive surgery, or somebody who has done fellowship for an year or two at
a comprehensive centre does not matter. It is essential that the individual is committed to progressive practice of surgical oncology in his/her area of work and committed to that alone.

I do realise that this is neither the end nor the beginning of a debate! The whole idea is to bring the elephant in the room to the centre of discussion and create an inclusive model. There are only two questions on my mind: Is the person adequately trained to handle his work and is committed to oncology work only, and whether his identity is part of the oncology team with its full paraphernalia. If the answers to these two questions are in the affirmative, then we are ready to serve our society in the best possible way.

As VS Naipaul said, ‘India is a land of million mutinies, where several centuries coexist.’ Our challenges are unique, and therefore we would have a definition depending on available infrastructure and trained manpower which is willing to work as a team for the larger good.

For us at the Indian Association of Surgical Oncology (IASO), the work is cut out. We have to work every day to ensure that all available knowledge is used to deliver the best treatment for our countrymen. To make this possible, we need to join hands and take questions and answers to and from the real frontiers. In this process we would contribute to the advancement of science as well. We must connect on each and every oncology platform like NCRP, NCG, NCCP etc. and use the power of the virtual world in true sense.

Message From the Secretary

IASO has been a torch-bearer in promoting Surgical Oncology on all counts.

As the membership expands rapidly, the role and relevance of the organisation and the responsibility of its leaders also expands.

Recent visits to Brazil as faculty in Latin American Cancer Congress, to Russia as a part of Eurasian Colorectal Congress and to China as faculty in minimal access Lung Surgery have convinced me that Indian surgeons have the ability to lead the world if a platform for budding youngsters is developed. As individuals and as an organisation, we need to regroup all our resources to head in this direction.

It was a wonderful year of good academics and fellowship. I appreciate all the help, good wishes and blessings of seniors and the support of EC and all the members, thus far. Hope to achieve much more next year.

Message from the Editorial Secretary

Cancer surgery is at the crossroads in India. The concept of organ-based specialty is developing in a big way across the globe. But unfortunately in India, the majority of cancer surgeries are still being done by general surgeons. The country in general is miles and miles away from the ideal world of highly focused and organ-based approach in cancer surgery. Across the country, we have a good number of trained and qualified surgical oncologists who are serving cancer patients in a commendable way. The structured training programme they have undergone in our training hospitals are best by any world standards and long years of practice of surgical oncology contributed significantly to the curing potential by scalpel. What should be the immediate way ahead regarding organ-focused specialty? This is the question we should answer at the earliest. Not only should we have a strong vision, we should also convince other stakeholders about it. The new model should lay emphasis on basic training in surgical oncology with further expertise in narrower specializations, which may be primarily organ-based or organ system based. This goes hand in hand with our past president Dr. Vijayakumar’s vision of enriching the fraternity by attracting young talents to the specialty.

IASO members are the torchbearers of Cancer Surgery in India. Many of its senior members are real luminaries, who adorn and have adorned key positions in various agencies and bodies that make policies in cancer management in the country. They can fulfil the dream plan of IASO by bringing it to the threshold of execution by various governmental and non-governmental agencies involved in Cancer management.

Long live IASO. Jai Hind!

Report on SSO 2016

I had the privilege and pleasure of representing and attending SSO 2016 at Boston with President Dr. Harit Chaturvedi. The meeting was attended by 1800 registered delegates and was very well organised with a well-planned scientific program and excellent faculty. The scientific topics mainly covered Breast, GI / Colorectal, HPB, STS, Lung, Melanoma, etc.

There were six young Oncosurgeons from IASO who presented their posters during the meeting that were well appreciated. These young surgeons also learnt a lot by attending a meeting of this stature & interacting with the august faculty. Dr. Harit and I also attended a meeting with the leadership of SSO & we had a very positive discussion and outcome. SSO leadership is very enthusiastic for having closer ties with IASO which would be beneficial for young members in particular by getting an access to their Journal & having more opportunities for visiting centers of excellence in USA.

The Indian delegation was received very warmly by SSO leaders and we were promised by the President-elect that he would certainly attend our NATCON IASO 2016 along with the Past President who couldn’t attend because of his health issues at that time.

We also attended the President’s Reception & Dinner in the evening and had the pleasure of meeting old colleagues and made new friends.

We must acknowledge and appreciate Dr. Chandra Are’s efforts to bring SSO and IASO closer.

The conference is being held at the Bangalore International Exhibition Centre, which is by far the largest conference venue in Bengaluru.

One of the unique features of ICC 2017 will be the release of the first publication on “Recent advances in Oncology” headed by Dr. Uday Kumar Maiya and Dr. A. Raghavan as the Editor in Chief.

The organizing committee expects that the 2nd Edition of ICC will attract more than 10,000 delegates and bring about a grand extravaganza of scientific feast. For online registrations & other information, please log on to www.indiancancercongress2017.com.
